

Dear friend from the future,

my name is Maria Rizou and I am 13 years old. My family is a nuclear family and I have one brother. His name is Vasilis and we study at the same school. My father's name is Aristotelis and my mother's name is Aggeliki. We all live together in Thessaloniki and I love them very much. I have a lot of friends and we go out and play together. Our school is quite large with many students. We spend several hours every day at our school studying. My favorite lessons are the language lessons, since I am very good at them. What's your name, which school do you attend and where do you live?

I have two hobbies, Judo and sailing. Judo is a martial art in which you learn how to defend yourself. Practicing Judo can help you be fit. Sailing is the art of controlling a sailboat. Sailing is one of the best sports, since we enjoy the sea and at the same time we develop a useful skill for the future. In my free time, which is somewhat limited, I go out with my friend Athina, as well as with other children.

In everyday life I do lot of different things. I wake up at 7:00pm, I eat my breakfast and I get to my school. Usually I enjoy being at the school and I am not stressed. However, this is not true if we have exams. After school, I get back to my home to eat and study. After studying, I watch TV for an hour and at 20:30 I attend my Judo class. At 22:00-22:30 I get back home again and I sleep. This is a typical day for me. What do you do in your everyday life?

I have a lot of dreams for the future. When I grow up, I want to be an architect. I am not sure how I will be able to achieve that, since I am not very good at mathematics. But I really want to be an architect. Also, I would like to continue practicing Judo and sailing. Furthermore, I want to have a big family, a big house and have four children, two girls and two boys. I would like to live next to my parents and to my brother and his family. What's your dreams my friend from the future? What job do want to do and what are your ambitions in life?

I am a bit puzzled about the nature. Nature is strange sometimes. In the November of 2014 the weather was too hot and now, just one month after that, it is snowing in the nearby mountains. Humans do not care about the nature and sometimes there are consequences, such as extreme weather. We should respect the environment because future generations may have serious problems. What's your opinion about that?
