Dear Future generation

Hi! Our names are Ann, Jane, Dave and Lacta. Ann is 14 years old and her hobbies are riding a bike, going out with friends and skating. Jane is 13 years old and her hobbies are in-line skating, sleeping and riding a bike. Lacta is 14 years old and his hobbies are playing Pc games, riding a bike and swimming. Dave is 13 years old and his hobbies are swimming, playing Pc games and running.

We would like to tell you about the future. As we see it, the world in 2114 will be good. In our opinion, there will be flying cars. People won't have to drive cars but computers will drive the cars. Trains will be faster than trains of our generation. There will be electric cars.

People will have modern glasses instead of smartphones. People will have chips in their heads for reading thoughts. People will be able to communicate with out speaking. Pupils in schools will have tablets in their desks. Pupils will use virtual reality. Pupils will not do their homework. Children will not go out with their friends and will stay home and play video digital games.

To conclude, we would be happy if you read this project in 2114 and live happily in peace.
