

•Teenagers life and schools in 2114?•

Three of us think there will be flying cars and on some roads small electric vehicles.

Two pupils are sure there won't be schools anymore and the teenagers will have to follow lessons on the net.

Most of us, declare technology will control everything.

If pollution and the change in climate make life on earth difficult, a lot of humans will be sent to other planets.

One pessimistic girl fears Third World War will break out soon, so the earth will be in ruins and only a few people will survive and struggle to live on.

An other girl, is very optimistic about our future, she hopes diseases will be cured: No one will die.
