Future!

Hello, I am Darina Foltová from the Czech Republic. I go to school in Borohádek. I am 14 years old. I am from VIII. B. My favourite school subject is P.E.

I think it is very hard to predict our future. But as I see it, the world in 2044 will be bad. In my opinion people are silly - often watch TV, play computer games. From my point of view people will have different problems. People won't do sport. They will have health problems. I think there will not be teachers in the future. And there will be online teachers on telephones, tablets and computers. Cars and planes won't be used. People will walk. Goodbye and enjoy your life!
